

# Supporting strong policy through robust data and evidence

Through evidence-based and effective policy, governments can partner in better outcomes for all Australians. For nearly thirty years, NATSEM has earned its reputation as a national leader in economic, social and community research.

The **National Centre for Social and Economic Modelling** provides independent and impartial research services to government, commercial and not-for-profit clients.

1993

Our economic and social modelling approaches were forged in close partnership with government

ESTABLISHED REPUTATION

Our research provides an evidence-base for policy leadership, advocacy and debate

PROVEN MODELS

Our spatial mapping expertise creates accurate and accessible online tools for the public

NATIONAL CENTRE OF EXCELLENCE

Our microsimulation supports rigorous data analysis, forecasting and future projection

DECISION FOCUSED

STINMOD+ enables policy leaders to test different national tax and welfare scenarios in real-time. Whether you're a policy-maker wanting to undertake taxation analysis or an advocate seeking evidence – STINMOD+ provides the perfect solution.

SpatialMSM allows analysis of the role of location and place when designing policy, targeting programs or delivering services. Whether it's the impact of poverty, disadvantage or drought - SpatialMSM supports small area estimates not available from the ABS.

Often, today's complex policy problems need more than just economic answers. Our extensive experience in social modelling and evaluation means that we can design the right mixed method approach for your 'wicked' policy challenge.
